

Nazer Hdaifeh

📊 Data Science 📦 Data Engineering ⚙️ RPA

📞 (+45) 42316710 — ✉️ nazerof@gmail.com — 🌐 linkedin.com/in/nazer-hd — 📍 Dybkjærvej, 8200 Aarhus

About me — Master Engineer in Mathematical Modeling and Computation with specialization in Data Science and Machine Learning. Experienced in designing and developing automated & Agentic solutions. Passionate about data analysis, App Dev, Visualization, Modelling, AI Agents, innovation. Always eager to embrace new challenges and collaborate on forward-thinking initiatives.

🏢 Work Experience

Freelance

Agentic AI & Data Science consultant

📍 Aarhus, Denmark

May 2025 – Now

Building agentic AI solutions and deploying on Azure with Docker + GitHub Actions. creating hands-on DevOps/MLOps courses. Delivered faster knowledge operations, automated documentation flows, reusable blueprints, and upskilled cross-functional teams.

🔖 AI Agents RAG LangChain AutoGen n8n Copilot Studio MCP DevOps Docker Azure GitHub Actions CI/CD.

EffectManager ApS

Data Scientist

📍 Skanderborg, Denmark

Jun 2023 – April 2025

Led RPA development using Power Automate to automate data gathering across 200+ Nordic retailers, eliminating manual processes. Enhanced legacy ML forecasting models with AI-driven time-series alternatives, improving supply chain accuracy through Streamlit PoC. Unified legacy pipelines into scalable Azure/GCS/OpenAI architecture, integrating with DataLake environments for end-to-end data processing.

🔖 RPA Power Automate MS 365 C# HTML Azure VM PowerShell OpenAI GCS Python Time Series Analysis Machine Learning Exploratory Data Analysis Modeling POC MLOps OCR Computer Vision GPT Azure Functions Azure Data Factory DataLake ETL Bitbucket

Valuebeat ApS

Data Scientist

📍 Copenhagen, Denmark

Nov 2022 – May 2023

Shaped product strategy by developing an AI agent to explore databases and suggest data-driven solutions, then developed models for approved suggestions, like predicting employee attrition forecasting.

🔖 Python SQL PostgreSQL Machine Learning Exploratory Data analysis Modeling PCA RAG(conceptual)

Statistics Denmark

Student Researcher — Machine Learning Engineer

📍 Copenhagen, Denmark

April 2022 – Oct 2022

Built an automated ML-based error detection system to identify data anomalies in national education records, improving data quality and enhancing the reliability of official statistics.

🔖 Python Machine Learning Exploratory Data analysis Modeling Statistical Analysis Sampling Data cleaning Visualization

Technical University of Denmark (DTU)

Teaching Assistant — Deep Learning Course

📍 Copenhagen, Denmark

Aug 2021 – Dec 2021

Facilitated hands-on learning in neural networks and deep learning by mentoring student projects, leading lab sessions, and co-designing course materials.

🔖 Neural Networks Deep Learning Mentoring Teaching PyTorch Jupyter Computer Vision NLP Data Labeling Curriculum Design Python

Advanced Schools

📍 Riyadh City, Saudi Arabia

Evolving from STEM teacher to Department Manager and American Diploma Director.

Department Manager — American Diploma Director

2016-2018

Aligning educational delivery with 21-Century standards, while embedding technology with the management process, I have overseen curriculum planning and implementing data-driven development and action plans.

Mathematics Teacher

2010 – 2016

Delivered STEM education based on both local and U.S. curriculum standards, promoting critical thinking. Contributed to curriculum development and assessment design, embedding technology and student-centered methods.

🔖 Leadership Strategic Planning Curriculum Design Academic Management Team Building STEM Education EdTech Critical Thinking Assessment Design Student-Centered Learning

Technical University of Denmark (DTU)

Master of Engineering in Applied Mathematics & Computer Science

Copenhagen, Denmark

2019 – 2022

– Focused on Data Science, Machine Learning, and Signal Processing.

– Participated in interdisciplinary projects applying statistical and ML methods in real-world contexts.

– Solid knowledge in data analysis and model development through hands-on coursework and team collaboration.

Tishreen University

Bachelor of Engineering in Information Management Systems

Latakia, Syria

2005 – 2010

– Focused on software development, IT infrastructure, and organizational information systems.

– Learned how IT systems align with and support business operations and decision-making.

Tishreen University

Bachelor of Science in Mathematics

Latakia, Syria

2004 – 2009

– In-depth knowledge in both abstract and applied mathematics including statistics, calculus, and algorithms.

– Built strong analytical and problem-solving foundations critical for advanced data science and modeling work.
